

Whole plant food nutrients that help your cells look after you...

A World First for tablets!

- ✓ No Binders
- ✓ No Fillers
- ✓ GMO Free

Whole plant based cellular support

Our cells are the source of our health

The health of a cell depends on three key points:

Nutrition - the cell must be nourished in order to grow and reproduce.

Protection - the cell must be well nourished in order to defend and protect itself

Function - the cell must be well nourished and protected in order to exercise its specific function.

A nutritional supplement that really works!

Thanks to this new biological complex called **Cellogie™** you can now provide your body with the nutritional support of plants, berries, fruits, vegetables and herbs straight to where its needed, when its needed.

What makes Cellogie™ so revolutionary?

Doctors and researchers designed the patented technology of the **Cellogie™** bio-granule by studying one of nature's great miracles, the snowflake. Using the unique Snowball effect of crystallisation, it eradicates the need for binders, fillers, capsules or coatings that plague many of the supplements on the market today which impede the digestion of supplements in the stomach...

This unique and patented manufacturing process is a world first and takes 20 days in total to form each bio-granule. By doing things slowly it helps keep in all those valuable whole plant nutrients which have been shown to help promote healthy cells.

Cellogie™ benefits:

- ✓ Gives your cells all the nutrients they need to stay healthy, protected and function efficiently
- ✓ Naturally restores the balance of nutrients
- ✓ Easily administered
- ✓ Only 0.7 calories per bio-granule
- ✓ Totally GMO free
- ✓ No capsule, no coating
- ✓ No loss of quality or quantity of active ingredients
- ✓ Does not contain gelatine, cellulose, artificial colours, alcohol, or preservatives
- ✓ Tested to demonstrate its effects clinically in human studies rather than just relying on laboratory evaluation
- ✓ Is absorbed in the mouth which means the beneficial active ingredients reach the blood stream quickly and get to work immediately!

The unique base: Complex B-Méditri®

The unique base is a fusion of two types of active ingredients found in every Cellogie™ bio-granule, they are formulated especially for increasing cellular protection.

The **first** consists of Solanum Lycopersicum, Olea Europaea and Vitis Vinifera, considered to be the most powerful antioxidants in the natural world today.

Solanum Lycopersicum
(Tomatoes)

Olea Europaea
(Olives)

Vitis Vinifera
(Grapes)

The **second** consists of Spirulina Maxima, Fucus and Ulva, which help to increase the intake of natural micronutrients such as vitamins, trace minerals and essential oils.

Spirulina Maxima
(Seaweed)

Fucus
(Brown Algae)

Ulva
(Sea Lettuce)

When these active ingredients are brought together in the Cellogie™, they simultaneously work together to improve the cells' intake of nutrients, protection, and their ability to function efficiently.

This part of the process takes 5 days to make. Then each bio-granule will have a further 15 days to crystallise to make them into the finished product by adding specific ingredients that relate to specific needs in the body.

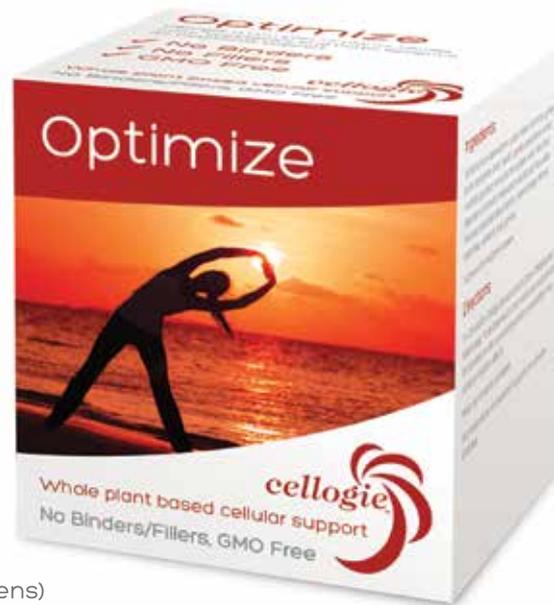

Main Circulation Ingredient:
Bilberry (*Vaccinium myrtillus*)

Main Detoxification Ingredient:
Desmodium Stem (*Desmodium adscendens*)

Ingredients:

Desmodium stem
Grape leaf
Bilberry fruit
Fumitory aerial part
Ginkgo leaf
Balm leaf
Dandelion root
Black radish root
Cypress cone
Complex B-Méditriol

£25.00/\$40.00

(24 x Circulation Bio-granules
and 24 x Detox Bio-granules)

Research:

- Regular bilberry consumption may reduce low-grade inflammation indicating decreased cardiometabolic risk in the long term. (Mol Nutr Food Res. 2012).
- Plant-based phytonutrients, many of which are targeted to helping protect the liver and also support it in its metabolism and excretion of toxic wastes, while also signaling your body to produce its own endogenous antioxidant system. Desmodium shows a significant protective effect of the liver. (Indian J Pharm Sci. 2011).

Circulate and Detoxify your way back to health

Cellogie™ Optimize contains two different bio-granules formulated to help the body with both blood flow and detoxification.

The Circulation bio-granule contains plants that have been shown to help reduce atherosclerosis (plaque build up in the arteries) and protect blood vessels from damage. It helps with the integrity of these blood vessels and allows for better tone and elasticity, which ultimately is responsible for better blood flow in the small capillary beds, where every cell is fed from.

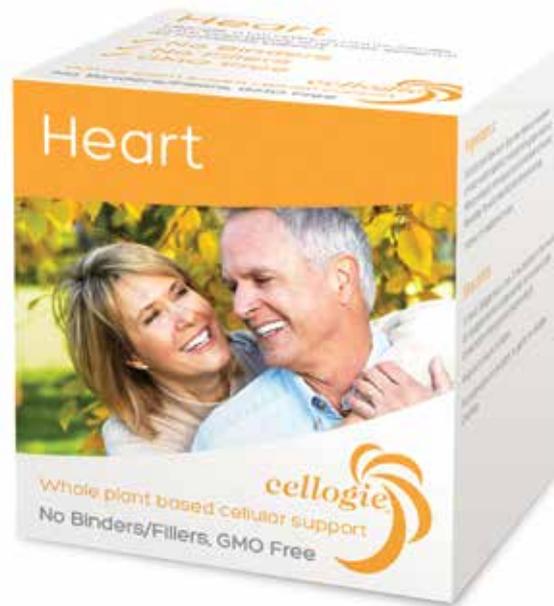

The Detoxification bio-granule contains plants that have been demonstrated to help the liver by both protecting it from damage, and by enhancing the speed it metabolises and clears out body toxins. These plants can have a synergistic effect on 'turning on' the body's natural antioxidant and anti-inflammatory' genes; thus causing a dramatic protection for all cells, not just the liver.

Combining the two bio-granules together on a daily basis provides a clear reduction in inflammation and free radical damage in the arteries, supporting better blood flow and support the body to expel toxins through the skin and excretory organs.

Whole plant based cellular support

Main Ingredient: Hawthorn
(Crataegus laevigata)

Ingredients:

Hawthorn
Hibiscus flower
Complex B-Méditriol

£25.00/\$40.00
(60 x Bio-granules)

Research:

- Hawthorn reduces blood cholesterol levels, (BMC Complement Altern Med. 2012), helps to protect the heart and reduces the damages that can occur following heart injury. (Phytomedicine. 2010).
- Current research to date suggests that hawthorn may potentially represent a safe, effective, nontoxic agent in the treatment of cardiovascular disease and ischemic heart disease. (Pharmacogn Rev. 2010).

Nutritional support for the heart

The heart is one of the most important organs in your body, and functionally, can never take a break! Every cell in your body requires proper blood flow and it all starts with the pumping of your heart.

Cellogie™ Heart uses some of nature's most beneficial plants that we have evolved with over millions of years which have shown to help with strengthening the heart and helping to increase cardiac output.

Scientific data also supports the ingredients in Cellogie™ Heart in their ability to lower elevated blood cholesterol levels.

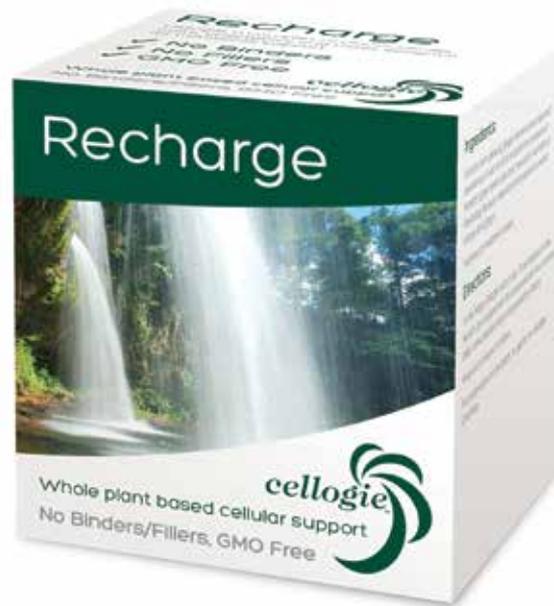

With the plants' abilities to lower inflammation in the blood vessels, Cellogie™ Heart provides an excellent cardiovascular support, that begins with the heart and ends with promoting vital blood flow to your cells.

Works where it's needed,
when it's needed

Main Ingredient: Ginseng root
(Panax ginseng)

Ingredients:

Ginseng root
Ginger root
Eleutherococcus root
Complex B-Méditrite

£25.00/\$40.00
(60 x Bio-granules)

Research:

- Ginseng helps in reducing symptoms from chronic stress, (J Pharmacol Sci. 2003), restore antioxidant capacities, (Nutr. Res. 2012), and increase energy and reduce fatigue, (J Ethnopharmacol. 2010).
- Eleutherococcus root increased endurance and mental performance in patients with mild fatigue and weakness. (Curr Clin Pharmacol. 2009). Considerable pharmacological experiments in humans have clearly demonstrated that Eleutherococcus possessed anti-stress. (Pharmazie. 2011).

Nutritional support for chronic stress

If you live or have been living a stressful life and finding yourself tired and fatigued, lacking energy both physically or emotionally, then you may have exhausted your stress hormones and your master organ - the adrenal glands.

Through the action of powerful plants, **Cellogie™ Recharge** naturally provides the specific nourishment needed for your body, and in particular the adrenal glands.

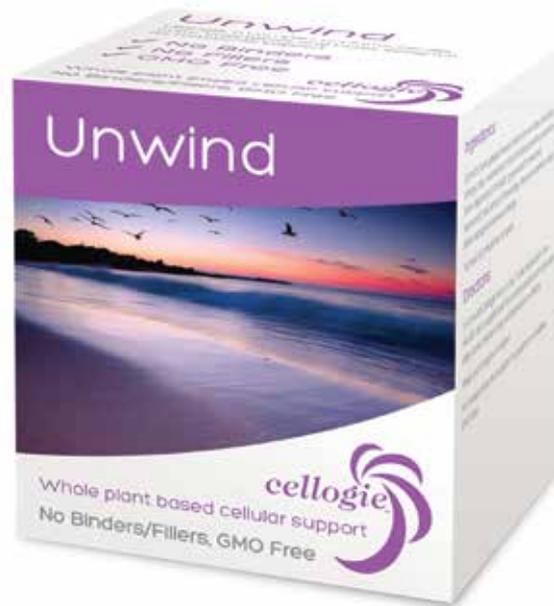

The **Cellogie™ Recharge** ingredients have been thoroughly researched for stress and fatigue showing dramatic improvement in many cases. Recover your stress-adaptation response and give your body a recharge.

Restore your cells,
recharge your body

Main Ingredient: Passionflower
(Passiflora incarnata)

Ingredients:

Passionflower
Linden flower
Lemon balm leaf
Lavender flower
Orange tree bark
Complex B-Méditri®

£25.00/\$40.00
(60 x Bio-granules)

Research:

- Strong evidence exists for the use of herbal supplements containing extracts of passionflower as treatments for anxiety symptoms and disorders. (Nutr J. 2010). Passionflower has shown decrease anxiety even before operations. (J Anesth. 2012).
- Lemon balm (*Melissa officinalis*) - it has been shown as an anti-stress and anxiolytic agent. (Med J Nutrition Metab. 2011). This study demonstrates, 'for the first time that chronic administration of *Melissa officinalis* L. relieves stress-related effects.' (Med J Nutrition Metab. 2011).

Nutritional support for relaxation

Our 21st century lifestyle and the pressures it brings gives us little time to relax, and shows no signs of slowing down. Many of us find it hard to relax, particularly in the evening and at night when you want to shut off your mind and go to sleep.

Cellogie™ Unwind is made up of plants that have been shown to calm down the nervous system. Many of these have been researched and proven to reduce anxiety.

Synergistically this formula has the potential to calm down the nervous system and help the body relax. If you find yourself to be 'highly-strung' and reactive to stressors around you, then **Cellogie™ Unwind** could be the answer for you.

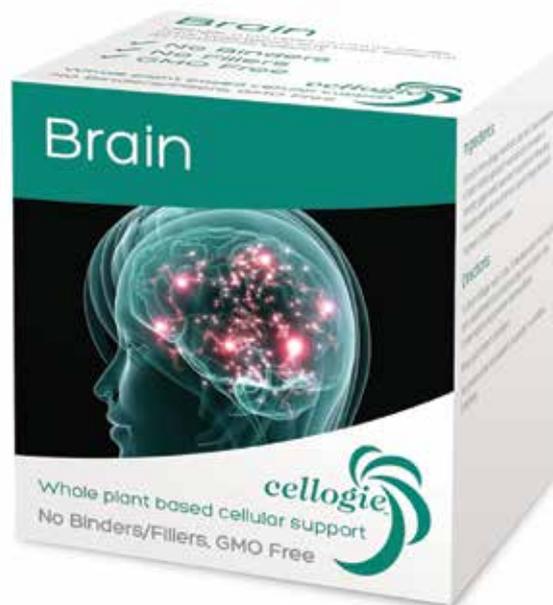

Try **Cellogie™ Unwind**, particularly if you find yourself losing sleep due to your body not being able to unwind after a stressful day.

Safe, effective
and 100% natural

Main Ingredient: Ginkgo
(Ginkgo biloba)

Ingredients:

Ginkgo leaf
Hawthorn flower
Olivier leaf
Basil leaf
Complex B-Méditriol

£25.00/\$40.00
(60 x Bio-granules)

Research:

- Ginkgo significantly improves memory and learning, particularly when there is compromised blood flow, (Zhong Xi Yi Jie He Xue Bao. 2012).
- It has also been shown to have a protective effect on the brain and reducing degeneration, (J Pharm Pharm Sci. 2012). It helps protect the brain and even recovery after major injuries like trauma and stroke, (Neurobiol Dis. 2012). It also helps to reduce the chance of strokes, (J Ethnopharmacol. 2011).

Nutritional support for the brain

The brain has a barrier, called the blood brain barrier so not everything can get through. This is a protective mechanism, however it causes limitation in certain medicines. Cellogie™ Brain contain plants researched and proven in their ability to cross this barrier and effectively protect the cells. In addition, these plants can have a significant effect on supplying extra blood flow to the brain, allowing for more cellular energy and better functioning.

The combination of protecting the brain while also enhancing blood flow and functioning makes Cellogie™ Brain beneficial for many people.

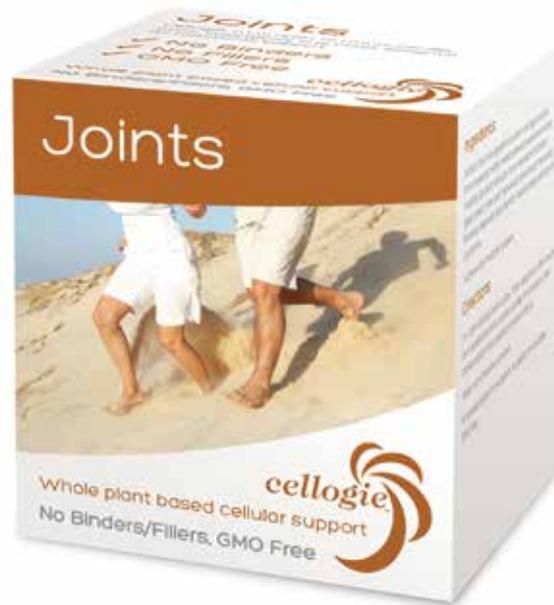

Cellogie™ Brain enhances brain development, learning, memory and also targets age-related degenerative brain disorders.

Plant-based nutrients
that focus on the brain

Main Ingredient: Devil's claw
(Harpagophytum procumbens)

Ingredients:

Devil's claw root
Shark cartilage
Horsetail aerial part
Nettle leaf
Meadowsweet leaf
Complex B-Méditriol®

£25.00/\$40.00
(60 x Bio-granules)

Research:

- Devil's claw is often used in the supportive treatment of inflammatory and degenerative diseases of the skeletal system, (Phytother Res. 2012).
- Shark cartilage is a biodegradable, biocompatible, nontoxic, non-immunogenic and non-inflammatory polysaccharide that may be used in treating rheumatoid arthritis. (Pharm Biol. 2012).
- Findings demonstrate that shark cartilage have excellent anti-rheumatoid arthritis activities and thus have great potential as a drug for treating rheumatoid arthritis diseases.' (Pharm Biol. 2012).

Nutritional support for the joints

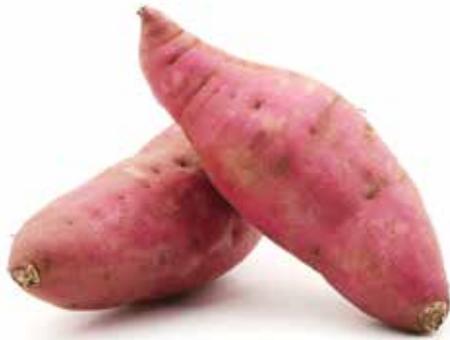

The joints and their surrounding soft-tissue and bones are particularly susceptible to damage, inflammation, and degeneration. This can be the result of repetitive actions (repetitive strain injuries), weight-bearing stress, immune reactions, or just simply degeneration of cartilage, a condition known as osteoarthritis.

Cellogie™ Joints contains plant-based nutrients that when combined, have been shown to provide a powerful anti-inflammatory effect on the body. Not only can this formula reduce inflammation, but key ingredients like shark cartilage have been shown to help repair damaged tissue in and around the joints, in some cases helping the repair of bone.

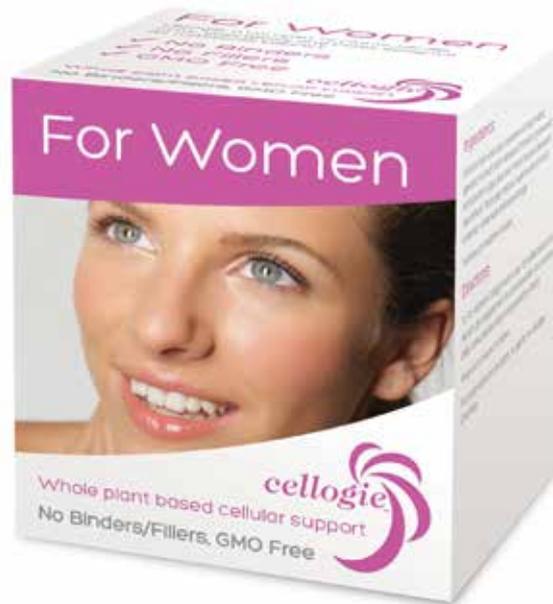

Of clinical significance, results have been demonstrated for osteoarthritis and other degenerative joint conditions.

Utilise nature's pharmacy
to reach optimum health

Main Ingredient: Yam
(Dioscorea villosa)

Ingredients:

Yam root
Soya seed
Sage leaf
Fenouil bulb
Régliisse racine
Complex B-Méditril®

£25.00/\$40.00
(60 x Bio-granules)

Research:

- Yam is rich in diosgenine, natural precursor of progesterone (whose scarcity is present at the origin of menopause disorders) that can be effectively used to help with menopausal symptoms. (Int J Biol Sci. 2011).
- Soy is rich in genisteine and daidzeine which are natural precursors to equal that presents greater oestrogen activity. (Eur J Drug Metab Pharmacokinet. 2012).

Nutritional support for women

You may be at that time of your life where you find yourself having hot flashes, irregular cycles, bloating, feeling up and down as well as tired and irritable.

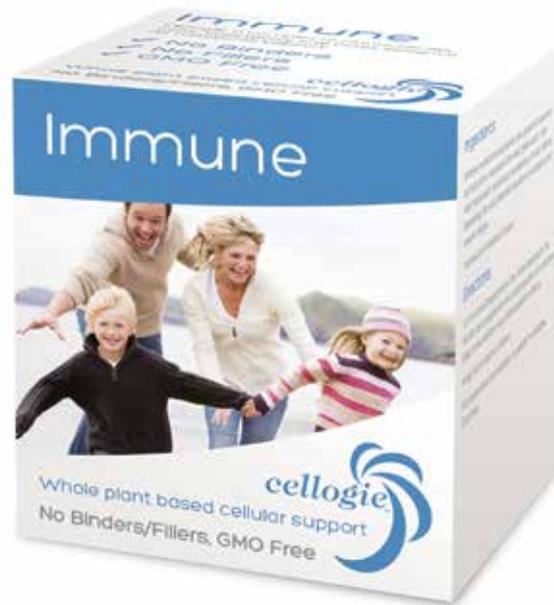

Cellogie™ For Women contains plant-based nutrients that, combined, have been shown to effectively minimise menopausal symptoms. The ingredients in Cellogie™ For Women helps to boost Oestrogen activity, facilitates better circulation and lowers stress levels.

Restore balance
within your body, naturally

Main Ingredient: Shiitake
(Lentinus edodes)

Ingredients:

Shiitake mushroom
Propolis
Pine tree needle
Grapefruit seed
Complex B-Méditril®

£25.00/\$40.00
(60 x Bio-granules)

Research:

- Lentinus edodes is used medicinally for diseases involving depressed immune function (including AIDS), cancer, environmental allergies, fungal infection, frequent flu and colds.' (Curr Med Chem. 2010).
- New compounds are being found every day that may explain its strong immune stimulating activities. (J Agric Food Chem. 2012). It was shown that given orally to elderly patients caused a safe and effective rise in immune activity. (Int J Med Mushrooms. 2011).

Nutritional support for the immune system

Your body is constantly under attack by various strains of bacteria, viruses, and other invading organisms and your immune system is primarily responsible for handling these.

However, your immune system is also handling and cleaning up damaged cells and debris in your body. It is a first responder to injury, inflammatory response and the production of collagen, which is needed for wound healing and is responsible for helping to find, target and kill cancer cells that have formed in the body.

As you can see, proper immune functioning plays a critical role for healthy living. Some of nature's most potent stimulators of the human immune system are contained in [Cellogie™ Immune](#).

An essential collection of nutrients
delivered straight to your cells

Main Ingredient: CLA
(Conjugated Linoleic Acid)

World's first!

- ✓ No Binders
- ✓ No Fillers
- ✓ GMO Free

Ingredients:

CLA
Guarana seed
Cherry stem
Complex B-Méditrite

£25.00/\$40.00
(60 x Bio-granules)

Research:

- The supplementation of CLA for 12 weeks in overweight and grade I obese Chinese subjects yielded lower obesity indices, with no obvious adverse effects. (Nutrition. 2012).
- It has shown to increase in metabolic genes and fat metabolism, (Lipids Health Dis. 2012), and in particular that it may have an effect in reducing obesity in post menopausal women. (Nutr Res. 2010).

Whole plant based
cellular support

Nutritional support for metabolism

Worldwide obesity has more than doubled since 1980 and is now considered to be of epidemic concern (World Health Organisation. 2012).

This is due to the fact that we are losing our ability to metabolise fat, whilst continuously eating more processed food in greater quantity to try and extract the little nutrition that is available in these foods, causing the body to store more fat. In addition our tendency towards a sedentary lifestyle (sitting in front of a computer/television) all contributes to an unhealthy weight.

Cellogie™ Weight Loss contains compounds that help your body oxidise and metabolise fatty tissue. This supports the body in taking fat stored and metabolising it for energy.
